

Top

Fitting Instructions:

1. Have the patient stand up straight.
2. Place the rounded edge of the string guide to the nape of the patient's neck.
3. Visualize a vertical line extending upward from the edge of the patient's shoulder blades. The flat edge of the string guide should land on this line.

- Curved design allows for shoulder comfort with mild neck extension.
- Curved cervical lobe follows the neckline, maintaining proper neck support as you roll from your side to your back.
- Large upper pillow section provides normal sleeping comfort.
